

ESSDE1-7e01 Variable list

This variable list contains all variables included in the country-specific ESS data set for Germany, 2002-2014 (ESSDE1-7e01, edition 1). It contains the variables' names, labels, and coverage across the first six waves of the ESS. Variables are listed in the exact same order of their appearance in the data set. For the exact question wording and coding of the variables, please refer to the official ESS documentation files/the German source questionnaires for the respective ESS waves using the following link: (<http://www.europeansocialsurvey.org/data/country.html?c=germany>).

The country-specific data set for Germany is based on the official ESS cumulative data file (ESS1-6e01, edition 1) and combines the official German ESS data of the first seven waves in one single data set. It thus includes not only those items which have been fielded at least twice in the ESS, but all German data from 2002-2014. In addition, the data set includes further country-specific items for Germany which have not been integrated into one single, cumulative data set before. These country-specific items have only been asked in Germany but not in other participating countries in a given wave. They come in two different forms: Either they establish completely *new variables* (see the additional country-specific variables at the end of the variable list, marked in **grey**) or they add *new data* to variables which have previously been part of the ESS but only been repeated in Germany in a given wave (see all entries marked in **lightgrey**). For further reference see also the related document "*Overview_new variables and data_ESSDE1-7e01*".

NOTE: The data set is available free of charge for non-commercial use. The country-specific, cumulative data set for Germany this variable list is referring to is **NO official ESS release**. The data set has been compiled by the ESS national team from Germany. The German ESS team bears full liability for the correctness and maintenance of the data set. If you encounter any inconsistencies or obscurities, please contact the German ESS team directly. The person in charge is Christian Schnaudt (schnaudt@uni-mannheim.de).
