

European Social Survey ERIC related studies form

The Related Studies section of the ESS website gives access to data relevant to the ESS user community but not part of the official ESS data and documentation. These studies have either fielded direct ESS questions, are developed in cooperation with the ESS, or have collected data with direct relevance to the ESS. All data collections meet the following methodological requirements:

1. The PI(s) and the fieldwork organization(s) subscribe to (an) ethical declaration(s).
2. The study adhered to national and/or international data protection regulations at the time of fieldwork.
3. Random probability methods were used at every stage of the sampling.
4. The data and documentation have been deposited at a national or international data archive.
5. The data file(s) which are publicly available to users have anonymized data only.
6. A questionnaire in English is available along the deposited data.
7. A documentation report with key parts of documentation/methodology (geographical coverage, universe included and excluded, mode(s) of data collection, sampling procedure(s), weighting, funders, access conditions) is available in English along with the deposited data.

PIs wishing for their study to be considered as a related study should complete the summary information form that follows.

Subject to the study's acceptance by ESS ERIC, the information provided in this document will be published on the ESS website (https://www.europeansocialsurvey.org/data/related_studies/) alongside a link to the study's archived data and documentation.

Studies wishing to be considered as a related study would normally be expected to discuss their intention with ESS ERIC prior to commencing fieldwork. Countries within the European Research Area would normally be expected to field the ESS as an ESS ERIC Member, Observer or Guest rather than as a related study.

ESS ERIC Related Study – Summary information

Please answer all questions in the Study section and questions 1 and 4 in the Mandatory criteria section (marked *). If more than two ESS modules were used in your questionnaire(s) (in addition to background variables), please fill in Question 7 separately for each module fielded.

1. Name of study: Australian European Social Survey (AussiESS)
2. PI(s) and responsible institution(s): Associate Professor Ben Edwards
3. Country(ies) and fieldwork period(s): Australia. The survey was conducted from 17 February to 2 March 2020
4. Is/are (a) **Persistent identifier(s)** (for example DOI) assigned to the datafile(s) [y/n]:
PID code(s):
5. **Mode(s) of administration**, main categories (tick all that apply).
 - Face to face
 - Telephone
 - Web self-completion
 - Paper self-completion
 - Other, specify:

6. **Background variables used** (section F in ESS questionnaires)

Number of background variables directly comparable to the ESS background variables: All

Have ESS variable names been used? [y/n]: Yes

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Yes; http://www.europeansocialsurvey.org/docs/round10/questionnaire/ESS-Round-10-Source-Questionnaire_FINAL_Alert-06.pdf

Variables F1, F2, F3, F4, F6, F7, F8, F11, F13, F14, F16, F17, F18, F19, F20, F21, F22, F23, F24, F25, F26, F27, F28, F29, F30, F31, F32, F33, F34, F35, F36, F37, F38, F39, F40, F41, F42, F43, F44, F45, F46, F47, F48, F49, F50, F51, F52, F53, F54, F55, F56, F57, F58, F59, F60, F61)

(Some of the exact numbers of the variables are not in exact concordance, i.e. F55 in the Aussie ESS is not exactly F55 in the ESS, it is F54 etc.)

7. **ESS topic modules used**

For each topic module used:

Module name: Core A1-A6

ESS round: 9

Number of variables directly comparable with the ESS variables: 6 (plus an additional question asking participant's sex.

Have ESS variable names been used? Yes

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Module name: Core B1 – B43

ESS round: 9

Number of variables directly comparable with the ESS variables: 41

Have ESS variable names been used? Y

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

.....

Module name: Core C1 – C42

ESS round: 9

Number of variables directly comparable with the ESS variables: 27.

C10 not included, Euro specific. C19 text response not multiple choice. No C20 variable. Ends at C30.

Have ESS variable names been used? Y

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Module name: Rotating Module D1 – D35

ESS round: 9

Number of variables directly comparable with the ESS variables: 9

Skips to D18. D18-21 not gender specific as was in ESS. Skips from D21 straight to D30. D30 not gender specific. No D35.

Have ESS variable names been used? Y

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Module Name: Core F1 – F61

Number of background variables directly comparable to the ESS background variables: 61

Have ESS variable names been used? [y/n]: Y

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Module Name: Rotating Module G1 – G32

Number of background variables directly comparable to the ESS background variables: 19

No G4-5, 11-12, 14-17, 22-25, 27-32.

Have ESS variable names been used? [y/n]: Y

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Module Name: Core Section H

Number of background variables directly comparable to the ESS background variables: 2

Have ESS variable names been used? [y/n]: Y

If no: Is a list of the variables and topics that are directly comparable available? [y/n]

Mandatory criteria confirmed by PI(s)

1. The PI(s) and the fieldwork organization(s) subscribe to (an) ethical declaration(s).
Which one(s)?*
2. The study adhered to national and/or international data protection regulations at the time of fieldwork.
3. Random probability methods were used at every stage of the sampling.
4. The data and documentation have been deposited at a national or international data archive.
Which one? *
Web address:*
5. The data file(s) which are publicly available to users have anonymized data only.
6. A questionnaire in English is available along the deposited data.
7. A documentation report with key parts of documentation/methodology (geographical coverage, universe included and excluded, mode(s) of data collection, sampling procedure(s), weighting, funders, access conditions) is available in English along with the deposited data.

This form is filled in by

Name: Ben Edwards

Position: Associate Professor

who confirms that the study is compliant with all the mandatory criteria listed above.

Disclaimer

The ESS ERIC, Core Scientific Team (CST) and the producers bear no responsibility for the uses of these data, or for interpretations or inferences based on these uses. The ESS ERIC, CST and the producers accept no liability for indirect, consequential or incidental damages or losses arising from use of the data collection, or from the unavailability of, or break in access to the service for whatever reason. The CST do not guarantee comparability with the corresponding ESS data and urges data users to assess this carefully.
